

The  
**ATCO**  
**LAWN EDGE  
TRIMMER**

**So simple to use.** Just place the serrated roller on the lawn edge and push, when the rapid continuous shearing action of the six-bladed cutter will neatly and efficiently clip the overhanging grass, leaving the lawn edge clean and tidy.

Wherever there are lawn edges of sufficient depth to be kept trim, whether they are in public gardens, institutes, sports ground enclosures, around bowling greens or private lawns, etc., the Atco Lawn Edge Trimmer is the ideal tool for the job.

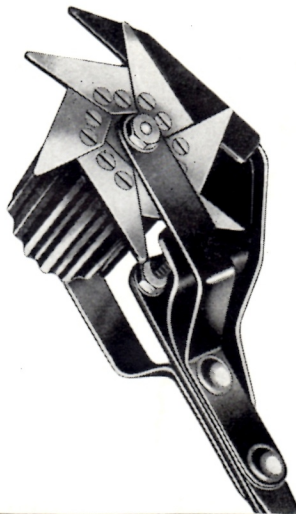

In comparison with long handled shears, this trimmer will efficiently deal with the same work in **one sixth of the time** and with less fatigue to its operator. Time, thus saved, can be usefully employed undertaking other more important duties.

Its flexibility of operation permits its use on lawn edges not readily accessible to shears, as for example around small diameter flower beds, and under overhanging shrubs.

**PRICE**  
**£3·0·0**
